Contents

Preface *xi*

How to Use This Book *xii*

Why This Book Uses NetLogo But You Don't Have To *xiv*

Summary of Chapters *xv*

Acknowledgments *xvi*

1 **Doing Violence to Reality** 1

- 1.1 Flocking Birds and Boids 2
- 1.2 What Are Models? 4
- 1.3 The Parable of the Cubist Chicken 6
- 1.4 Decomposition 8
- 1.5 Formal Theory in the Inexact Sciences 11
- 1.6 Why Model? 12
- 1.7 Some Models of Note 14
- 1.8 Equation-Based Models and Agent-Based Models 16
- 1.9 Fine-Grained and Coarse-Grained Models 20
- 1.10 The Journey Begins 21

2 **Particles** 23

- 2.1 NetLogo Basics 24
 - 2.2 Programming Basics 26
 - 2.3 Particle World 30
 - 2.4 Coding the Model 32
 - 2.5 The Components of a Model 39
 - 2.6 Describing a Model 43
-

2.7	Flocking	46
2.8	Reflections	48
2.9	Going Deeper	49
2.10	Exploration	50
3	The Schelling Chapter	53
3.1	The Puzzle of Segregation	53
3.2	A Model of Segregation	55
3.3	A Formal Description of the Model	61
3.4	Thinking about Consequences	62
3.5	Coding the Model	63
3.6	The Power of Play	68
3.7	Model Analysis	70
3.8	Analyzing the Segregation Model	73
3.9	Reflections	77
3.10	Going Deeper	79
3.11	Exploration	80
4	Contagion	83
4.1	The Diffusion of Innovations	84
4.2	Spontaneous Adoption	84
4.3	Social Influence: The SI Model	89
4.4	The Analytical SI Model	93
4.5	Getting Better: The SIS Model	95
4.6	Staying Better: The SIR Model	103
4.7	Reflections	109
4.8	Going Deeper	110
4.9	Exploration	111
5	Opinion Dynamics	117
5.1	Building a Model of Opinion Dynamics	118
5.2	Opinion Dynamics Under Positive Influence	121
5.3	Bounded Confidence	125
5.4	Negative Influence	130
5.5	Multiple Opinions, Polarization, and Extremism	134
5.6	Reflections	146
5.7	Going Deeper	146
5.8	Exploration	147
6	Cooperation	151
6.1	The Prisoner's Dilemma	152
6.2	Evolutionary Dynamics	153
6.3	Cooperation and Assortment	156
6.4	Reducing Assortment	164
6.5	Positive Assortment and Hamilton's Rule	166
6.6	Reciprocity	169

6.7	The Evolutionary Stability of Reciprocity	174
6.8	Reflections	180
6.9	Going Deeper	181
6.10	Exploration	184

7 Coordination 189

7.1	Norms with Symmetric Payoffs	191
7.2	Group-Beneficial Norms	199
7.3	Group-Beneficial Norms in a Structured Population	204
7.4	Division of Labor	215
7.5	Reflections	218
7.6	Going Deeper	219
7.7	Exploration	220

8 The Scientific Process 223

8.1	Science as Hypothesis Testing	224
8.2	Bayes' Theorem	225
8.3	Science as Bayesian Inference	229
8.4	Science as a Population Process	231
8.5	Science as a Cultural Process	236
8.6	Why the Most Newsworthy Science Might Be the Least Trustworthy	249
8.7	Reflections	250
8.8	Going Deeper	252
8.9	Exploration	253

9 Networks 257

9.1	Network Building Blocks	258
9.2	Network Architectures: Order and Chaos	263
9.3	Small-World Networks: Short Paths and Strong Clustering	269
9.4	Simple vs. Complex Contagion on Small-World Networks	276
9.5	Preferential Attachment	280
9.6	Other Social Drivers of Network Structure	285
9.7	Reflections	286
9.8	Going Deeper	287
9.9	Exploration	289

10 Models and Reality 293

10.1	The Mapping Problem	294
10.2	Nine Lessons for Turning an Idea into a Model	295
10.3	Analyzing Your Model in Light of Itself	301
10.4	Analyzing Your Model in Light of Empirical Data	303
10.5	Fitting Models to Data on a Rugged Landscape	309
10.6	Reflections	314

11	Maps and Territories	315
11.1	The Map Is Not The Territory	315
11.2	We Need Many Maps	318
11.3	The Journey Continues	320
	<i>Image Credits</i>	321
	<i>Bibliography</i>	323
	<i>Index</i>	339
